Melo, A. S., Pereira, R. A. S., Santos, A. J., Shepherd, G. J., Machado, G., Medeiros, H. F. and Sawaya, R. J. 2003. Comparing species richness among assemblages using sample units: why not use extrapolation methods to standardize different sample sizes? – *Oikos* 101: 398–410.

1) page 400, Table 1. Correct form for Exponential (expo) function:

$$S = a/b(1 - e^{-bx})$$

*** it is missing an “/” between “a” and “b” in the printed article.

2) page 401, second line after the first formula. The correct symbol for the gamma function is the upper case (Capital) of the Greek letter gamma:

Γ

and NOT the lower case:

γ

3) page 401, second formula. Correct form:

$$\Delta_{0\gamma}(t) = \left(\frac{n_1}{\gamma}\right) \log(1 + \gamma t)$$

*** the letter “t” was printed as an exponent of “γ”

Results presented in the article were obtained using the correct formulae.

We apologize for any inconvenience this may cause.
